Dr. J. Wittenborne
Rutgers - The State University
26 1/2 Morrell
New Brunswick, New Jersey

Dear John,

Enclosed are two reports given in the recent ACNP meeting.

The report "EEG Classification of Psychoactive Compounds in Man," is complete. The report "EEG and Human Psychopharmacology IV: Clinical Antidepressants" is minus legends for Figures 7 and 8. The third report "Neurophysiology of the Phantastica" will be a similar review to the EEG classification of approximately 20 pages text and 10 pages citations. Unfortunately I could not finish that before I left for Europe and rather than send you the edited copy from which Dr. Itil and I have been working, I would ask your indulgence and it should be on your desk by March 8.

Thank you for your patience.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
