

14 May 1973

TO: Morton G. Miller, M. D.  
FROM: Max Pink, M. D.  
SUBJECT: Electives in 2nd Year - August 1973

1. I regret that my laboratories at SB will probably be closed for 3 weeks in August, and I cannot provide supervision there.
2. At VAH/Northport, I anticipate Dr. Swanson and Dr. Don could assist me by providing an opportunity for a student to examine veterans abusing different substances (opiates, alcohol, barbiturates); to observe the effects of heroin on behavior, mood, and respiration, and pupils; to observe blocking effects of narcotic antagonists.

If possible, I would arrange one session at SB labs to demonstrate effects of drug on brain function.
