

June 10, 1964

Dr. Albert A. Kurland
Director of Research
Department of Mental Hygiene
Spring Grove State Hospital
Baltimore 28, Maryland

Dear Al:

I would be pleased to have Dr. Delamonica visit our laboratories during the second week in July. We will, of course, make every effort to provide him with accommodations. I must tell you, however, that the accommodations are in the main building of the St. Louis State Hospital and these are rather warm for this time of the year. I have requested that one of the apartments be set aside for Dr. Delamonica and his wife, and if these are satisfactory upon his arrival, he will be free to use them.

Dr. Itil will be available during that period of time and we will do our best to let Dr. Delamonica participate in our program.

It was a pleasure visiting with you.

Sincerely yours,

Max Fink, M. D.
Director
