Miss Steny Cuesta
ISI
Philadelphia

Dear Miss Cuesta,

Thank you for the special search, a copy of which is enclosed. This search elicited some additional articles of interest in the drug field, but none additional for computers and neurophysiology. The additional items from the drug literature are welcome. The additional articles regarding digital computers alone are 'misses' insofar as the field of digital computers is very large and the usefulness of the service would be abridged if all were recalled, including the many that are of interest to phases outside my interest.

I am not sure what the difference in logic is among the various types of questions. The items of interest are those that include:

- Drugs/man
- Drugs/EEG (neurophysiology/man
- Drugs/ all subtypes of psychoactive
- EEG/computer/digital
- Brain/computer digital
- Brain/drugs

I appreciate your efforts on my behalf. Thank you.

Sincerely yours,

Max Fink, M.D.
