Mr. Hayes A. Dorr
Coordinator, Special Projects
Institute for Scientific Information
325 Chestnut Street
Philadelphia, Pennsylvania 19106

Dear Mr. Dorr:

Thank you for your letters regarding the ASCA III Program.

I believe a trial subscription might be useful and I am enclosing two pages of profile entries which follow your suggested model. If I am correct, the six items listed as 1A1 and eight items as 1A3 should result in citations if one word or stem from any 2 of the 3 groups is cited. Thus EEG, Period Anal; or Computer/Drug; or Electroenceph/Psychot will result in a citation.

Similarly, any articles citing Adey's article in Experimental Neurology will be listed.

If these two understandings are correct, I would like a suggested charge for this service for one year.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
