Dr. Milos Vojtechovsky
Institute of Pharmacology
School of Public Health
Caroline University
Prague, Czechoslovakia

Dear Milos,

The Program Committee of the CINP has asked that we provide them with abstracts of the papers read at the recent symposium so that these can be published with the proceedings by *Excerpta Medica*. I have taken the abstract which you submitted to me, and made a few minor editorial corrections. Copies of the abstract as submitted are enclosed. I am also enclosing the abstract for Dr. Vitek.

If these are in any way unsatisfactory, please edit them and send them to me promptly so that I can send them on to the publisher.

I have just completed my move to New York and I am yet too unsettled to be able to send you the journal that you requested. I will do so just as soon as I am in my new office.

Incidentally, I have taken the supply of *l*-cycloserine with me to New York, since Dr. Simeon is planning to join me in October and we hope to be able to undertake some studies in my new laboratories. Perhaps, I may remind you that I will need some information regarding the preparation of this compound before I can file the necessary papers with the authorities both in New York and the FDA in Washington.

In the meanwhile, may I thank you for your consideration in sending me such wonderful stamps.

My best regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
