Dear Bill,

Some time ago you asked that I review the volume by Wittenborn, "Clinical Psychopharmacology of Anxiety". I regret that I neglected to do it for so long-- I guess I repressed the project since I found the volume less interesting than many others-- but I finally found the time and the result is enclosed. If it still interests you, please use it. If not, perhaps you'll try another.

My best.

Sincerely yours,

Max Fink, M.D.
