

March 27, 1967

Dr. Victor M. Victoroff  
Associates in Neuropsychiatry  
2231 Taylor Road  
Cleveland 12, Ohio

Dear Dr. Victoroff:

Thank you for your referral for LSD treatment. The LSD treatment and study program was undertaken in St. Louis in 1962 and was available to long term mentally ill only. There seemed no justification for therapeutic trials with LSD in others, since other treatment methods have generally been efficacious.

Since moving to New York in June, I have not re-instituted an LSD treatment program and so cannot offer one to your patient. We are, however, interested in subjects who have not responded to other treatments (as I assume is true for this patient) and are actively engaged in testing a variety of novel therapeutic agents, especially in patients with a history of non-responsive depression.

If your patient may be interested in participating in such a treatment program, I would be pleased to review a summary of her case history and to advise you as to the suitability of our methods.

It was kind of you to think of us, and my associates and I wish to thank you for your consideration.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
