Dr. E. N. Whitman  
Hoffman LaRoche, Inc.  
Nutley, New Jersey 07110

Dear Dr. Whitman:

I was pleased to have the opportunity to discuss our program with you once again in Atlantic City.

Your mention that Hoffman LaRoche was producing tetrahydrocannabinol is of special interest to us. If supplies may become available for experimental use, would you please let me know to whom we may write. We are anxious to undertake such studies, as we have recently proposed a study of the EEG characteristics of this drug. Unfortunately, we find that the supplies are limited and we are anxious to obtain such from whatever source.

I would like to plan to visit you in June and will write to you again.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
