Dr. Vincent Cremata
Chas. Pfizer & Co.
Groton, Connecticut

Dear Vince,

At a recent meeting of the Formulary Committee of Metropolitan Hospital on the recommendation of the Chairman of the Department of Psychiatry and the Chairman of the Psychopharmacology Study Group, thiothixene was placed on the Formulary of the Hospital for one year trial.

We have recommended its use to our residents and it would be very helpful if supplies could be made available for their use through the pharmacy of Metropolitan Hospital. Mrs. A. Cruzado is the chief pharmacist.

Would it be possible for you to arrange to have an adequate clinical supply made available to the pharmacy?

Many thanks.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
