

October 10, 1966

Dr. Jonathan O. Cole
National Bank Building
6917 Arlington Road
Bethesda, Maryland 20014

Dear Jonathan,

Enclosed are complete budgetary estimates for the proposed study program "Quantitative EEG Studies in Psychopharmacology" (MH-13358-01).

The salaries are consistent with those of the College, as are the listed fringe benefit components. I have estimated the first year operation with some of the personnel beginning at mid-year, and have added a machine operator in the second year and an additional clerk in the third. The program is planned so that by the middle of the second year (1968), we will have enough personnel to carry on a second computer shift, thus providing adequate facilities for the service element of this proposal.

The program director is identified as a physician-neurophysiologist. The computer director will hopefully be someone with the qualifications of Dr. Donald Shapiro.

Thank you for your consideration.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
