Dear Mr. Weingarten:

I am pleased to enclose a review of "Psychophysiology at an Interface" by Clinton C. Brown as requested. It has taken me a bit longer than I expected, because I found the report somewhat obtuse on re-reading and began to wonder why it was selected. Surely, there must be more important contributions than this one which warrant reprinting.

I trust this is satisfactory.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
