Dr. Eli Robins
Chairman
Department of Psychiatry
Washington University
School of Medicine
St. Louis, University

Dear Eli:

Dr. Fini Schulsinger, the director of the psychiatric department at the Kommunehospitalet in Copenhagen, Denmark, will be visiting St. Louis on February 26th. I anticipate that he will be arriving in the evening of the 25th and must leave on a 7:00 flight, on Friday, February 26th.

He is the clinical psychiatrist in a collaborative project with Dr. Mednick, in which they are assessing psychiatric and various psychophysiological measures in the children of schizophrenic mothers. They apparently have well defined criteria for the selection of patients, as well as controls.

Concurrently, he is also participating in a genetic survey with Dr. Seymour Kety. I do not know the details of this study, but it may be of considerable interest.

Would you care to arrange for him to present some of his findings and studies to the staff?

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
