Richmond, Virginia

Dear Bill,

I am pleased to enclose a draft copy of our final report, "EEG Profiles of Fenfluramine, Amobarbital and Dextroamphetamine in Normal Volunteers", as submitted to *Psychopharmacologia*.

Separately, I am sending you a complete report which contains additional data analyses. We found some redundant and abstracted our experience for the report for publication. You may elect to use either report for your files and references.

Many thanks for your interest; and my best regards.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
