Dear Don,

I am pleased that your idea for a consortium meeting on biomedical research is progressing. I have written to Iver Small, in his capacity as secretary of the Society of Biological Psychiatry, and have asked his support at the next meeting of Council. Since that will be in June, if you have need of the Society support before that time, please write to him directly, and I am confident that he will act positively, even before the Council meets formally.

When next you talk to Charlie, remind him that you need the SBP support, as he is an active member of the Council.

Good luck.

Sincerely yours,

Max Fink, M.D.
