Dr. Jonathan Cole
National Bank Building
6917 Arlington Road
Bethesda, Maryland

Dear Jonathan:

Turan has returned from the New Orleans meetings with a great deal of enthusiasm and I want to thank you for extending this invitation. I regret that I was unable to attend but the meeting of our Psychiatric Research Foundation was held on Friday and it was important that I be there.

Turan mentioned that our report on EEG and behavioral changes in our therapy resistant patients which we sent to you may have been misdirected. I am taking the opportunity of submitting two additional copies of the same report for your consideration, either for the *American Journal of Psychiatry* or *Psychopharmacologia*.

Many thanks for your consideration. Incidentally, I enjoyed reading Sid Merlis' paper and have gone ahead and recorded a number of evoked potentials with a period of 1000 millisecond. Our records are quite variable and only occasionally seem to match the samples submitted in that report. However, his suggestion appears to be a good one and we will continue to collect additional data in this dimension.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
