Jack Durell, M.D.
The Psychiatric Institute
2141 K Street, N.W.
Washington, D.C. 20037

Dear Jack:

Enclosed is an abstract, *Marijuana, Hashish and Tetrahydrocannabinol-N-9: Effects on EEG, Heart Rate, and Mood*, for your consideration for the October meetings of the Psychiatric Research Society. The report will describe dose-related EEG, heart rate and self-report effects, with a focus on the relations of brain changes to behavior.

Should you wish, Peter Crown will illustrate the mood effects by a song "The Talking Killer Weed Blues".

The presentation can be made in 20 minutes, but we would enjoy an opportunity for discussion, thereafter.

Sincerely yours,

Max Pink, M.D.
Professor of Psychiatry
