Editor, *Psychopharmacologia*  
Boston State Hospital  
591 Morton Street  
Boston, Massachusetts 02124

Dear Jon:

I am pleased to submit the enclosed report, " $\Delta^9$ -Tetrahydrocannabinol Effects on Human Electroencephalogram, Heart Rate, and Mood" for your consideration for *Psychopharmacologia*. In this study, we have demonstrated an equivalence between the effects on physiologic measures of smoked  $\Delta^9$ -THC and marijuana, as well as dose related effects. The study also provides evidence of EEG-behavioral relations for this psychoactive compound.

Incidentally, I want to thank you for recommending my appointment to the editorial advisory board of the journal - I trust I will be able to support the quality of the reports in the journal.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
