Dr. Doris H. Clouet
Associate Research Scientist
New York State Research Institute for
Neurochemistry and Drug Addiction
Ward's Island, New York 10035

Dear Doris,

Enclosed are copies of the two reports which we are submitting for publication in your volume.

The reference to Wikler 1965 should be deleted from the electrophysiological report.

The quotation of Lewin was originally published in 1942 in German. In 1964 his work was translated and published by Dutton and Co. and it is that edition from which the quotation is taken. I believe the quotation an appropriate frontispiece and would be pleased to have it head the article. The way in which the 1942-1964 discrepancy can be justified would be by adding at the foot of the frontispiece: Lewin, 1942 (translated, 1964).

Thank you for your kind statements about the articles and my best regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
