Dr. Philip A. Boyer, Jr.
Marion Laboratories, Inc.
10236 Bunker Ridge Road
Kansas City, Missouri 64137

Dear Dr. Boyer:

Enclosed is the summary of the pilot pyrovalerone - EEG study in volunteers. The data is sufficiently clear to answer the questions set for this study, i.e., behavioral and EEG effects are readily apparent at 160 mg pyrovalerone (single dose) in normal, adult volunteers; and that this dose is safe and well tolerated.

I have sent a copy to Drs. Itil and Pfeiffer, as I had promised in our initial discussions in Miami in December.

After reading this summary, would you call me regarding any additional data you may require for your records.

My best regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
