Dr. G. F. Blane  
Clinical Research Co-Ordinator  
Dansom Lane  
Hull, England

Dear Dr. Blane:

We would like to continue our exploration of antagonists by studies of M5050. I have obtained an import permit (#2533) and your copy is enclosed.

Can you make a small supply available?

Can you make available a description of the completed animal toxicology, and a description of the formula, chemical synthesis (in narrative outline or literature references), address of site of preparation, and a copy of labelling data. I will need these for the U.S. F.D.A. to file an IND.

I trust these are the next steps, and would like to proceed.

You will note that the permit lists M99 as well - this is to be ignored.

Many thanks for your cooperation. I hope we can make some clinical use of this interesting compound.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
