

November 14, 1966

Dr. Allan F. Mirsky
Division of Psychiatry
Boston University School of Medicine
Boston, Massachusetts

Dear Dr. Mirsky:

Some months ago you were kind enough to send a preprint of your report "The Relation of EEG and Performance in Altered States of Consciousness" to my associate, Dr. Itil. The preprint is co-authored by Eva Pragay.

We are preparing a final draft of our report on the dissociation of EEG and behavior with anticholinergic drugs which was presented at the 1965 meeting of the American EEG Society, and would be pleased to quote your report. Can you tell me where this is being published? The copy we have is undated but has 16 pages of text, two pages of legends, six pages of citations and eight figures. I hope this information identifies the manuscript.

Many thanks for your assistance.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
