Dr. Edgar Grunwaldt
Geigy Pharmaceuticals
Ardsley, New York

Dear Ed,

Enclosed please find a protocol of our proposed child psychopharmacology study program. This study is designed to give us experience in studying drug treatments in children and adolescents so that in the future we may be able to assess new compounds.

As described in the protocol, we are anxious to provide medication in liquid vehicle. At this time I would request your assistance in making available to us imipramine in liquid vehicle, both 25 mg and 10 mg/teaspoon. If 4 oz. bottles are available may we have a dozen of each.

In addition, may I request 12 bottles of placebo for this compound?

My best regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
