Rockville, Maryland 20852.

Dear Al,

At the recent EEG meetings, I had the occasion to discuss ongoing projects with various workers, including Walter Obrjst at Duke. He is acquainted with the cardiovascular and some of the cerebral effects of hyperbaric chambers. It may be useful for your project to review his work.

The meetings also surfaced some advances in portrayal of results that are becoming increasingly available, and which may improve your proposed studies.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
