Dr. John F. Monroe
Associate Medical Director
The Squibb Institute for Medical Research
New Brunswick, New Jersey 08903

Dear Dr. Monroe:

I was grateful for your discussion yesterday regarding the supplies of fluphenazine decanoate for our study group in Istanbul. I have written to Dr. Polvan indicating that he will hear from your representative. I have urged him to use this new supply when it is available so that our observations can be in parallel.

The study program here has gone quite well. We have eleven patients now in treatment and three additional are in a drug free period and will probably begin their treatment program early in April.

Thanking you in advance for the additional supplies of medication, I remain,

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
