

June 20, 1967

Mr. Robert Shearman
IBM Corporation
211 Montague Street
Brooklyn, New York

Dear Bob,

In line with the continued development of the EEG analytic facility of the Department of Psychiatry at 5 East 102nd Street, I would like a quotation and a commitment from IBM for the delivery and installation of a special communication adapter and the associated equipment for a Control Data 217 CRT Entry Display Unit. This unit will be remotely located and will communicate with the 1800 by telephone lines. We have requested delivery of the unit from Control Data for 11-1-67 and would like the IBM adapter available at that time.

Please submit a formal quotation for proper approval.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
