Richmond, Virginia

Dear Bill,

I am sending under separate cover the final report on "EEG Profiles of Fenfluramine, Amobarbital and Dextroamphetamine in Normal Volunteers". This incorporates copies of all the statistical procedures which we used in analyzing the fenfluramine data. I suggest that you keep this copy as a matter of your records and use the abstracted report submitted last week.

I want to thank you once again for your cooperation and patience in this study.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
