

July 14, 1969

Dr. Michael Taylor
9309 Murillo Avenue
Oakland, California 94605

Dear Mickie,

Enclosed are letters, draft copies of various papers and two papers that need your attention.

"The Influence of the Sex of Hospitalized Schizophrenics on Therapeutic Dosage Levels of Neuroleptics" has been corrected by me. A xerox is enclosed for your changes. The original is on my desk and the figure is now being made.

The hypothesis paper has been corrected and a xerox copy is enclosed.

Please correct both and send them back to me. I presume you want to send the hypothesis paper to *Lancet* and the "Influence of Sex ..." to the *British Journal of Psychiatry*. If you will send along a covering letter for each we will get them out.

The letters from Drs. Bouthilet and Wortis et al. require your attention.

The letter from Dr. Gottlieb has been answered and I have taken the liberty of sending him a copy of the hypothesis paper. Dick Abrams has written a protocol on penicillamine and this will be processed in the next few weeks. Dr. Volavka has found more to do with the lactate and that will take some time. The notes on the hormonal treatment of schizophrenia are interesting and I have asked Dick to write a protocol. I hope that we can do the penicillamine at Manhattan State and the hormonal treatment in Montrose.

My best regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
