Richard Shader, M. D.  
Director of Psychopharmacology  
Massachusetts Mental Health Center  
94 Fenwood Road  
Boston, Mass.

Dear Dick:

It was kind of you to spend time with us at Key Biscayne. Both Peter and I enjoyed your discussion very much and we left encouraged that blood level and EEG co-relations were worth the effort.

Should it be possible for you to collect some EEG, we will be glad to make our facilities available to provide you with analysis. Perhaps the meeting of the Society of Biological Psychiatry in Boston next month may provide an opportunity for us to discuss this further.

Again, my thanks.

Sincerely yours,

Max Fink, M. D.  
Professor of Psychiatry
