William C. Janssen, M.D.
Director of Clinical Research
Lakeside Laboratories
Milwaukee, Wisconsin 53201

Dear Dr. Janssen:

Dr. Itil and I are pleased to enclose the FD 1572 and associated documents, including a protocol for our study with Ditran. The protocol also includes reference to our use of THA as a blocking agent on the occasions when unusual side effects such as restlessness and coma-like state supervenes.

We would be grateful for a supply of Ditran sufficient for 100 investigations. Dosages range between 10 and 15 mg per administration, and assuming that the ampules will be 7 1/2 mg per ampule, we would request 200 ampules.

With regard to THA, and assuming that the concentration will still be 30 mg/10 cc, we would request a like amount of 200 ampules.

Thank you very much for your cooperation.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
