National Institutes of Health  
Bethesda, Maryland 20014

Gentlemen:

In checking through the Research Grants Index for fiscal year 1963, Volume I, I was interested in determining whether any grantees were measuring the electroencephalographic changes induced by drugs in dogs. On page 292, the citation for dogs (experimental) suggests that compilation can be obtained on request.

I would be grateful for any citations of a study supported by the National Institutes of Health in the area of electroencephalography, dogs, experimental, with or without the use of psychotropic or other drugs.

Thank you very much.

Sincerely yours,

Max Fink, M. D.  
Director
