Dr. Harold L. Williams
Chief, Dept. of Clin. & Social Psychology
Division of Neuropsychiatry
Walter Reed Army Institute of Research
Walter Reed Army Medical Center
Washington, D.C.

Dear Harold:

It was a pleasure to work with you at the Clinical Committee meeting. I am writing to request your recommendations regarding possible staff members to participate in the experimental psychology research program here.

As you may know, Dr. Itil and I are interested in studying the relationship between acute and chronic changes in brain function as measured by EEG patterns and behavior best labeled as states of "vigilance". For this reason we believe that studies utilizing such tasks as continuance performance or reaction time are possibly helpful.

I am looking, therefore, either for a recent graduate who has had experience in laboratories similar to your own, or a more advanced worker whose collaboration and concurrent participation would be most gainful both to him and to us. I would be most grateful for your recommendations.

Many thanks,

Sincerely yours,

Max Fink, M.D.
Director
