Secter

Dr. Leon S. Otis
Stanford Research Institute
Menlo Park, California

Dear Dr. Otis:

The latest issue of *Science* indicates that you and your associate Dr. Pryor are presenting a paper on the effects of electroconvulsive shock on behavior, brain weight, and brain chemistry.

This is a subject of considerable interest to me and I would be grateful for the opportunity to read your report, or a summary of it. My interest has been in cholinergic mechanisms in the convulsive therapy process and I would be interested in any data which you have collected in this regard.

Many thanks for your co-operation and my best wishes for a successful symposium.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
