Dr. Alfred Bruner, Head
Experimental Psychology
Lovelace Foundation for Medical
Education and Research
5200 Gibson Blvd., Southeast
Albuquerque, New Mexico 87108

Dear Fred,

Enclosed is a copy of the Annual Review paper. I did miss you in San Diego. The lord willing and if the body not week, I plan to attend the meetings at Snowmass.

As for additional studies of methadone, I think these are not only advisable, but essential. In New York support could be obtained from the narcotic addiction agencies and perhaps the same would be true in New Mexico. But you should be no different than the rest of us and make an application to NIMH. Dr. Sidney Cohen is in charge of the addiction research programs and he might welcome another basic science program.

I would be honored to be a consultant provided, of course, that you plan to invite me to New Mexico during the winter.

We have finished two reports on our experiences with methadone for a volume by Dr. Clouet and copies are enclosed. Dr. Roubicek has also written a draft about methadone and a copy of that is enclosed. These may be useful.

My best regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry

Hi Fred,

Shelley has decided that she would like to be a lady of leisure for a while. At present she plans on being a tourist in New York and then just doesn't know what she will do.

Kathy
