Dr. Philip R. A. May
Clinical Director
The Neuropsychiatric Institute
UCLA Center for the Health Sciences
Los Angeles, California 90024

Dear Phil,

I want to thank you for your consideration in sending me a copy of the volume "Treatment of Schizophrenia", which I read with care and a great deal of interest. As Jonathan Cole said in the summary, the study will probably never be repeated because the conclusions clearly indicate the superiority of biological treatment methods over milieu and psychotherapy. In some ways, I regret that such a study had to be undertaken, for the data which is so convincingly presented here, was well known soon after the phenothiazine became available.

Please accept my congratulations on a study well done and well completed.

My best regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
