

November 21, 1967

Mr. Robert Shearman
IBM Corporation
411 Montague
Brooklyn, New York

Dear Mr. Shearman:

Pleased be advised via this communication that the New York Medical College Division of Biomedical Information Processing requests that the following equipment be delivered to be attached to the 2701 Communications Adapter.

7698 Synchronous Data Adapter
3855 Expansion Feature
3815 Extended Capability

As you well know, this equipment is being ordered in lieu of IBM's inability to deliver an adapter for the 1800. A January 1968 delivery is imperative because of the delivery of the front end equipment at that time and because of an already shattered time schedule. This equipment is to be billed as part of the separate billing statement to Dr. Max Fink.

Sincerely yours,

D. M. Shapiro, D.Sc. and

Max Fink, M.D.
