153 West 11th Street
New York, New York 10011

Dear Fritz,

Attached are some notes regarding the ACNP symposium on training in clinical psychopharmacology. I would suggest a telephone survey of a number of centers to answer some simple questions regarding the type of instruction in clinical psychopharm at the undergraduate and residency levels. The principal question is who does the teaching, how often, texts, if any, and format.

Copies of my notes are attached and these may form the basis for an outline which can be used for a telephone survey.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
