Paul L. Raduns, M.S.
Central Elementary School
Fourth Avenue & Second Street So.
St. Cloud, Minnesota 56301

Dear Mr. Raduns,

I regret to say that the answer to your question is unknown to me. I do not know if male and female children differ in their levels of ACTH.

I have sent your letter on to Professor David deWied in Holland. He is the principal investigator of this program and perhaps he will have an answer for you.

Sincerely yours,

Max Fink, M. D.
Professor of Psychiatry
