Dear Michael,

Thank you very much for sending me a copy of BOOK PRO PLUS, and for translating one of my SCIMATE files to the BOOK PRO format. I have used the system, following your suggestions.

It is a useful system for citation retrieval, and easy to learn. I was able to use the search strategy and to enter new citations. In each activity, the program performed well.

After some thought, I find that I cannot adopt the system for my use; mainly because my investment in SCIMATE is so great, making it uneconomic for me to convert all my files to the new system.

I am returning the material sent me, with my thanks. My best regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
