Dr. Alain Sanseigne
The Squibb Institute for Medical Research
Georges Road
New Brunswick, New Jersey

Dear Alain,

It was kind of you to invite me to participate in the discussion of fluphenazine. I must tell you that I enjoyed the afternoon very much, and I hope that the contribution was helpful to you and your associates. I am impressed with the data of fluphenazine decanoate, and am anxious that this program continue. Surely, a liberalization of the dosage ranges will make fluphenazine more acceptable to hospital psychiatrists.

I also have had an opportunity to read the summary of data on SQ10,496. This is indeed an interesting compound and Dr. Horovitz is to be congratulated on the description he provided. If there is an opportunity to study this compound later this spring, I believe we would be interested in doing so.

Need I tell you how much I enjoyed our dinner Friday evening? Your wife and yourself were outstanding hosts and provided an evening that Turan and I will long remember.

My best personal regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
