

July 30, 1974

William P. Blakemore, M.D.
Sterling-Winthrop Research Institute
Rensselaer, New York

Dear Dr. Blakemore,

The studies of levo-cyclazocine were undertaken at the New York Medical College in 1971-1972. When I left the College in September, 1972 to my present appointment, the records of that study, with the data and responsibility for the other ongoing studies in opiate dependence, were transferred to my successor, Richard Resnick, M.D.

I have a study program in progress at the Drug Dependence Treatment Center at the VAH- Northport, and we are exploring the clinical efficacy of naltrexone at this time.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
