University and Woodland Aves.  
Philadelphia, Pennsylvania 19104

Dear Joe,

Enclosed are two copies of my contribution, "EEG and Clinical Psychiatry", for the textbook. I have elected not to include a number of EEG figures, since these are ably reproduced at greater length in the citations. If, however, you believe the report may be improved by examples, I will submit some representative figures.

There is a single table, reproduced from my 1969 report. If acceptable, I will write to the publisher for permission to reproduce.

I trust the report is useful, and I thank you once again for your invitation and your patience. My best wishes for the success of this volume.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
