Dear Sir:

The Department of Psychiatry of this Medical College has recently embarked on the development of a computer facility focussed on the problems of the analysis of physiological signals. For this purpose, the laboratory is being equipped with an IBM 1800 system. It is anticipated that the College will, within the next eighteen months, expand their present computer facility to a larger unit.

The equipment for the Department's computer center is to be delivered during the first week of May. We are now appointing programmers. This will be a small laboratory, consisting at its maximum of 8-11 staff members.

If this opportunity interests you, I would appreciate your calling my secretary for an appointment at 369-7900 Ext. 247.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
