David Tedeschi, Ph.D.,
Department of Pharmacology,
Lederle Laboratories,
Pearl River, N.Y. 10965.

Dear Dave,

Following our discussion in San Juan, I am taking the liberty of enclosing a summary report from 1969 and a more recent report of our studies using the EEG profiling in potential psychoactive drugs. You will find similar reports written by Itil.

I trust this is helpful.

My best regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
