Irvine, California 92664

Dear Jim,

The application for a conference on the psychobiology of ECT has been completed, and I am enclosing a copy. Your suggestions were most helpful, and have been recommended almost in their entirety.

Tom Williams believes he can get the application before the appropriate committee in April.

Seymour Weingarten of Plenum wrote of your new publication series and asked about publishing this conference. I asked that he send whatever descriptions he develops so that we can make a decision. Good luck on the series!

My thanks for your help.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
