AIR MAIL

January 22, 1964

Dr. Don Walter
Brain Research Institute
U. C. L. A.
Los Angeles, California

Dear Don:

Let me take this opportunity to thank you on behalf of the American College of Neuropsychopharmacology for your participation in our recent program. Your report was excellent and your comments on the reports of the other participants were most helpful.

I am personally grateful to you because you did much to make the present programs clear and their relationship to my own interest cogent.

I have already begun changing the filters in our own program following your recommendation. I would appreciate, however, a copy of the NEEG as it now exists. Mr. Don Shapiro, who has been helping me in this work, is quite interested in the logic of your new approaches and it would be helpful if he could see the program, even if it is incomplete.

My thanks again.

Sincerely yours,

Max Fink, M. D.
Director
