Re: IND 6590

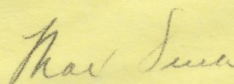

Dear Al,

The studies of levomethadyl are continuing, and we recently submitted documents notifying the FDA that we have expanded the studies to my new facilities at the VAH-Norfolkport and SUNY at Stony Brook.

The reports of the initial studies have also been submitted to your office; but in the event that these have not been filed with this IND, I am submitting copies herewith. The initial report appeared in JAMA 220:811-813, 1972; and the second is in press in the same journal.

Thank you for your reminder.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
