Springer Verlag  
Berlin, Germany

Gentlemen:

On my return from an extended trip I found the proofs of the figures for the article 993 for Psychopharmacologia. Anticipating the delay, I had returned the galleys earlier, and am now enclosing the figures with the page of the galley duplicate to which the figures refer.

I have indicated their location.

In printing the figures, the editor has removed the titles from each figure, leaving them unidentified. It is necessary that the figures receive the proper identification:

1. Primary Baseline Cross Delta (0-3.5 Hz)
2. Primary Baseline Cross Alpha (7.5 - 13.5 Hz)
3. Primary Baseline Cross Beta (+ 40 Hz)
4. First Derivative Baseline Cross Average Frequency
5. First Derivative Baseline Cross Alpha (10-16 Hz)
6. First Derivative Baseline Cross Beta (+50 Hz)

Thank you for your cooperation.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
