Dr. Ira Belmont  
Albert Einstein College of Medicine  
East Chester Road  
Bronx, New York

Dear Ira:

Enclosed is a letter from Dr. Robinson regarding the Rorschach report. I am pleased that it has received the acceptance of the editors, but find that they have some questions which require an answer.

Their first question is one that we have discussed at length and while we had agreed to report only these findings which were significant, I believe this should be made clear in the text. I know of no theoretical reason why "psychic energizers" should have the effects measured by these scores, and specifically with schizophrenics. Do you?

The second question has never come up before and I would be interested in your comment. Is there some way of analyzing the data anew following their suggestion?

I have sent a copy of the letter to Max. If there is some merit in getting together to discuss this, I plan to be in New York at the meetings between December 5th and December 8th. If this is not necessary, I would be pleased to hear from you by mail.

Sincerely yours,

MISSOURI INSTITUTE OF PSYCHIATRY

Max Fink, M. D.  
Director
