

November 28, 1968

Dear Joyce,

I was pleased to talk with you and I look forward to your visit to Gracie Square Hospital-- the site of our convulsive therapy study, on Thursday morning. I would ask that you meet with my associates and discuss your study, review our records and study and assist us in the further development of this program by answering those questions which already have an answer.

The hospital is at 420 East 76 Street and our laboratory is on the main floor. We would anticipate meeting about 9:30 a.m.

I shall try to attend the Eastern EEG meeting and we should be able to make the plans more definite at that time. In the event that I cannot come, I can be reached at 369-7900 or in the evening at 516-466 5444.

The physicians involved are Drs. Richard Abrams, a resident physician and project leader; Dr. Jiri Roubicek, Visiting Professor and recently emigrated from the Prague Psychiatric Institute; and Dr. Marting Green, and attending neurologist and long time co-worker. Our psychologist, Dr. Rhea Dornbush will also attend.

I am most grateful for your assistance and look forward to meeting with you next week. Have a good flight !

My best regards to Ivor.

Sincerely yours,

Max Fink, M.D.
